

Natural Stone Veneer Sheets

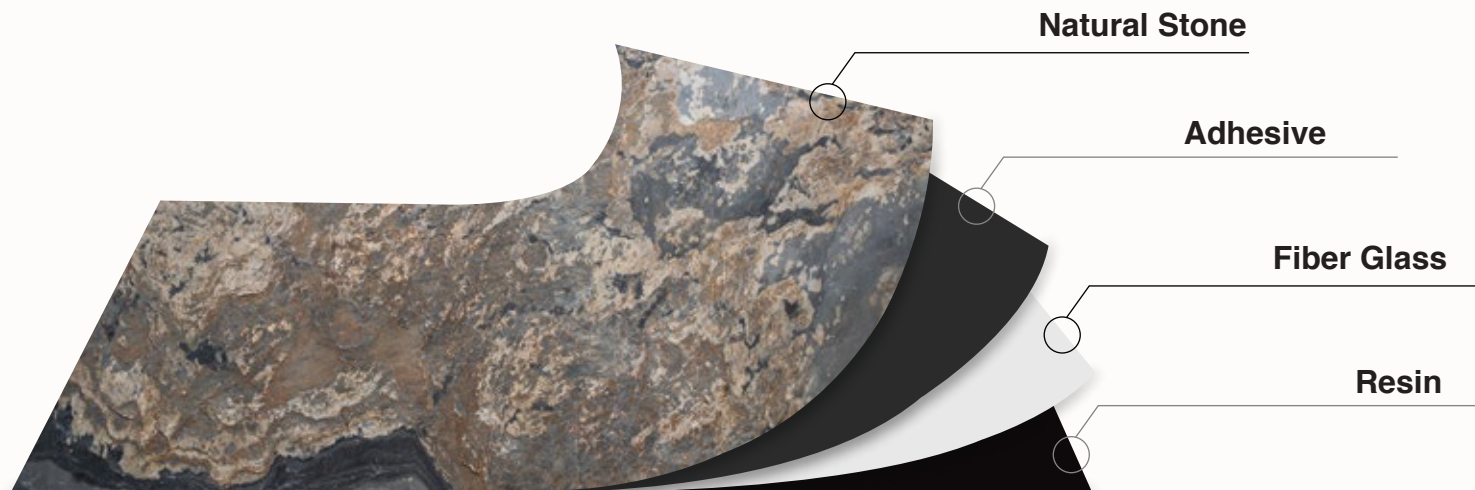

Natural stone veneer sheets are made of natural slate. The slate surface is split and separated into very thin layers of stone from 0.6mm to 2 mm thick. It is then combined with fibre glass and polyester resins to create a flexible panel.

The total thickness of thin stone veneer panel is 2mm. Irregular surface of slate and variety of colour make every sheet unique. Thin stone veneer is so light and flexible making it possible to use stone in places where use of typical stone cladding would not be possible or viable.

It can be used on curved walls and partitions, columns, ceilings wet rooms, bathrooms and also on doors or furniture. Thin stone veneer is so light and flexible making it possible to use stone in places where use of typical stone cladding would not be possible or viable. The applications for thin stone veneer are endless. It can be used on curved walls and partitions, columns, ceilings wet rooms, bathrooms and also on doors or furniture.

Applications of flexible stone veneers include: **backsplashes, window sills, residential flooring, ceilings, walls, columns, curved surfaces, furniture, light weight signage, lighting, shower and bath remodeling or new installations.**

Composition of skin Flexible Slate Veneer

RUSTED

1220 x 2400 mm

The rusted look evokes a sense of history and permanence, fitting well into the broader trend of industrial and brutalist design. It brings character and texture to minimalist, modern forms.

Rusted

MARBLE

1220 x 2400 mm

Cosmos White

Marble

Artic

Marble

A bright marble with a majestic gleam and attractive shades of White and Black.

TREVERTINE

1220 x 2440 mm

Travertine is a naturally occurring material that requires less processing than synthetic alternatives. Plus, because veneer uses a thinner cut of stone, it's a more resource-efficient way to enjoy the look and feel of full stone walls.

Mother Earth

Backlight

Fresh Earth

Backlight

Translucent Veneer is a lightweight, flexible, colourful and unique stone veneer with a transparent backing so they can be back lit to create a translucent finish.

Each sheet will differ as every piece consists of a thin layer of real stone and no two stones are exactly the same.

SLATE & QUATRIZE

610 x 1220 mm

A classic among slate veneers that fills every room with sense of elegance. An attractive shimmering of anthracite gives this popular slate its special appeal.
