Ulin Decking

Ulin Decking & Merbau Flooring

WHAT IS TIMBER FLOORING?

Timber is a natural flooring choice for home and business owners. The timeless aesthetic and other benefits offered by wood floors have meant that timber remains a competitive flooring option on the market. Whether you choose parquetry, wide plank or a floating timber floor, you'll receive the best of Exifloor export experience in the industry.

WHAT IS THE DIFFERENCE BETWEEN SOLID AND ENGINEERED TIMBER FLOORS?

Solid timber flooring is produced from timber planks without layers, whereas engineered timber planks are manufactured by layering different pieces of wood to produce a single board.

WHICH TYPE OF TIMBER FLOORING IS BEST?

It's natural you may be unsure about whether to choose solid timber, engineered timber, reclaimed timber or other kinds of planks. Choosing a timber floor is less about which is "best", and more about which is the most appropriate for your intended use of the space.

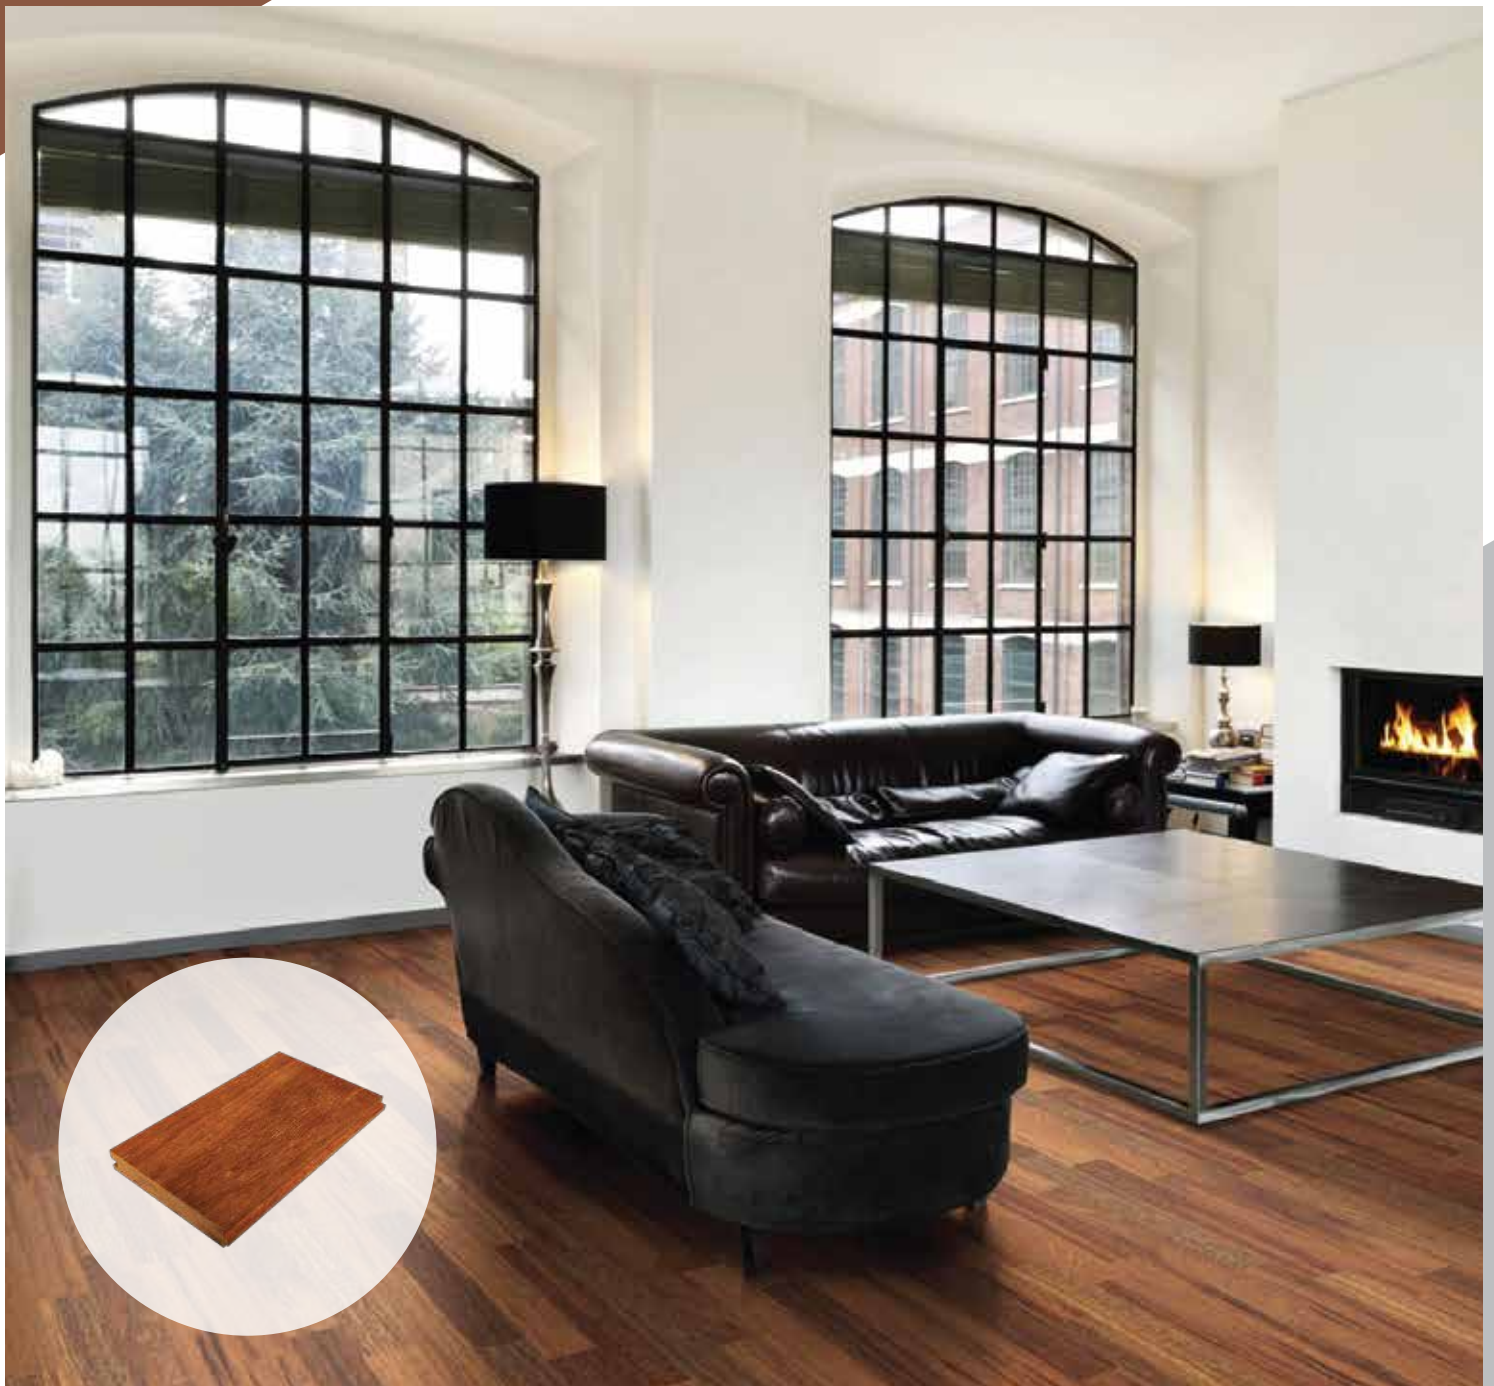

HOW LONG DOES TIMBER FLOORING LAST?

Solid and engineered timber floors will both last a number of decades, depending upon how you use the space where the floor is to be installed.

HOW TO CHOOSE WOOD FOR YOUR NEW FLOOR?

Wood offers a range of benefits compared with other types of flooring:

Merbau : For indoor use
Ulin : For outdoor use
