ABOUT US

We believe that aluminum is the future of architecture. It is a versatile, sustainable, and easy-to-work-with material that can be used to solve a variety of architectural problems.

We are committed to providing architects with the best aluminum products to help them create innovative and sustainable buildings.

Vision

To be the primary supplier of new architectural products that help architects design more sustainable, efficient, and beautiful buildings.

Mission

- To provide customers with innovative and high-quality products that are both stylish and functional.
- We are committed to using our expertise and creativity to solve complex design challenges and deliver products that meet the needs of our clients and the environment.
- We are constantly looking for new ways to improve our products and services, and we are committed to working with our clients to create buildings that are both beautiful and sustainable.
- We are constantly looking for new products to complete our products and services, and we are committed to working with our principals to create favorable cooperation, even joining a venture to open a factory in Indonesia.

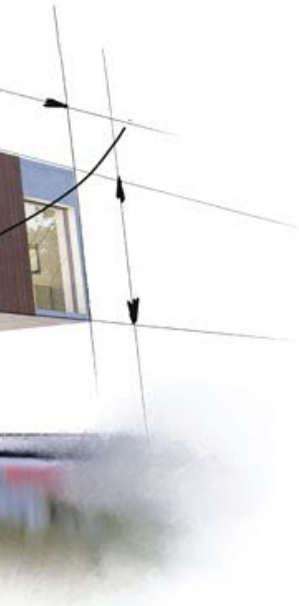

OUR EXPERTISE

Decoration and Functional

You can use aluminum battens to create a decoration and functional addition to your home or office.

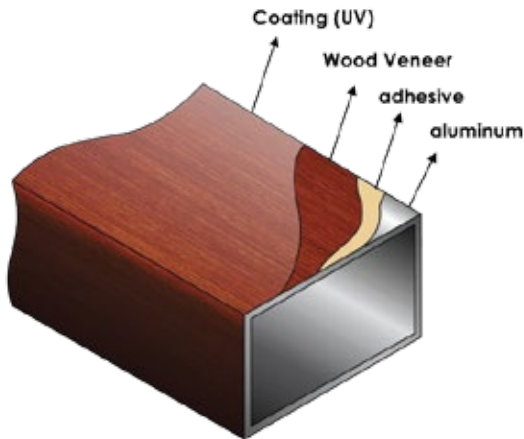

Aluminum battens with a wooden finished are made from a lightweight and durable material that is resistant to corrosion and moisture. They are also easy to install, and they come in a wide variety of sizes, colors, and finished.

This makes it a good choice for complex architectural projects.

BRAND

ALUMINIUM VENEER
ALUVEEN®

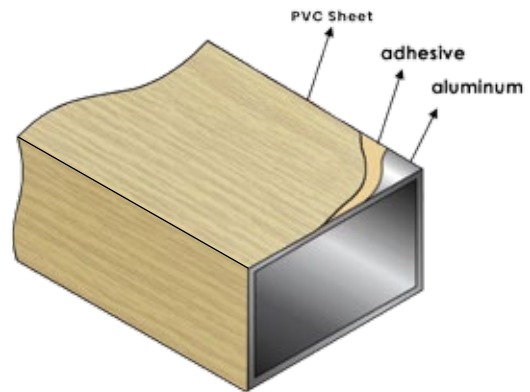

Aluminum Veneer

“Feeling First”

We’ve developed the capability of wrapping ultra-thin Veneer over aluminum profiles. and coated by UV Coating

Aluveen come in a wide variety of sizes, wood veneers, and finishes.

ALUPLAS
ALUMINIUM COATED BY PVC SHEET

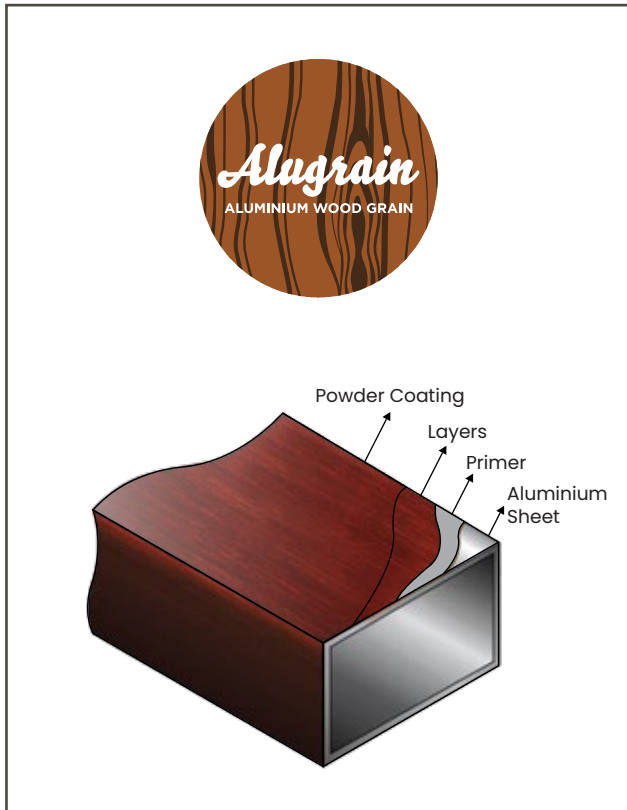

Aluminum Pvc-Sheet

Own Interior
Intuition

To make sure your own budget, We’ve developed the capability of wrapping PVC-Sheet over aluminum profiles.

If you are looking for a way to add a touch of style to your commercial space, aluplas are a great option.

BRAND

Aluminum Wood Grain

"New Heritage"

This process is used to create wood grain effects on aluminum.

Sublimation is a process that allows you to transfer a design from a paper to a substrate, such as aluminum.

Aluminum Decor Panel

Coloring the Landscape

It is an aluminum panel in the form of a sheet, with a thickness ranging from 1 mm to 3 mm.

The production technology process is printed and coated directly on the aluminum sheet.

The most important part of product selection, whether it is a good or a service that it helps support competitive advantage.

DECORATION PROFILE

ALMORA

Profile	Dim (cm)		Tebal	Panjang
	A	B	mm	meter
Almora	15,00	2,00	1,50	6
Almora	10,00	5,00	1,20	6
Almora	10,16	2,54	1,20	6
Almora	8,00	4,00	1,35	6
Almora	6,00	4,00	1,80	6
Almora	5,08	2,54	1,00	6
Almora	4,00	2,00	1,50	6
Almora	3,80	2,50	1,00	6

This makes it a great choice for outdoor decorations that will be exposed to the elements.

This is especially important for large or complex decorations.

BELO

Profile	Dim (cm)		Tebal	Panjang
	A	B		
Belo	10,16	10,16	1,95	6
Belo	5,08	5,08	1,20	6
Belo	3,81	3,81	1,00	6
Belo	3,00	3,00	1,00	6
Belo	2,00	2,00	1,20	6

This allows you to choose a finish that will complement the decor of your home or office.

RAVEL

Profile	Dim (cm)		Tebal	Panjang
	A	B		
Ravel Profile	10,00	5,00	1,20	6
Ravel Profile	4,00	4,00	1,00	6

Aluminum can be used to create a variety of interior decor items.

Aluminum can be recycle at the end of its life, which helps to reduce environmental impact

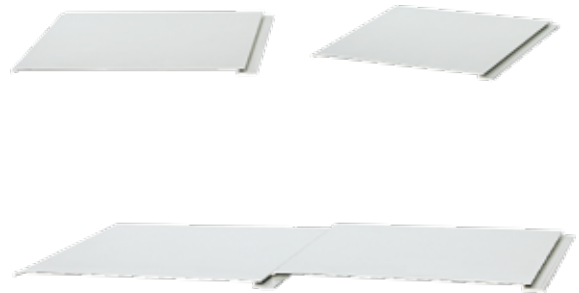

COZY

Profile	Dim (cm)		Tebal	Panjang
	A	B		
Cozy	8,00	2,00	1,00	6
Cozy	10,00	1,20	1,20	6
Cozy	15,00	1,50	1,50	6

This makes it a good choice for budget-minded homeowners and businesses.

LOTTO

Profile	Dim (cm)		Tebal	Panjang
	A			
Lotto	20,00		1,00	6

Makes it a safe choice for decorations in areas where fire is a concern.

Aluminum is a low-maintenance material, so you won't have to worry about spending a lot of time cleaning and polishing your decorations.

PANEL

Profile	Dim (cm)		Tebal
	A	B	mm
Panel	122	244	1,00

Aluminum sheets offer a versatile and durable solution for decorative panels.

Artellion

Profile	Dim (cm)		Tebal
	A	B	mm
Alcoat	122	305	0,60
			1,00
			1,50
			2,00

Aluminum cladding can be used to give buildings a modern and sleek appearance.

WOOD VENEER

Wrapping ultra thin veneer technology is a process that allows you to apply a very thin layer of veneer to a substrate, which is aluminum.

This process is often used to create decorative or functional surfaces that are lightweight and durable.

WOOD GRAIN

Aesthetics

This process involves applying a powder coating to the aluminum surface.

The powder coating is then baked at a high temperature, which fuses it to the surface. The powder coating can be dyed to create a wood grain appearance.

Aluminum wood grain technology is a cost-effective alternative to traditional wood products.

GALLERY

We hope that you will take some time to browse through the gallery and see the many ways that we can use aluminum to create beautiful and functional products.

ALUMINUM DECOR PANEL

Standard Size

Thickness : 2.0mm/3.0mm
Width : 1,220 mm
Length : 3,050 mm

Coating

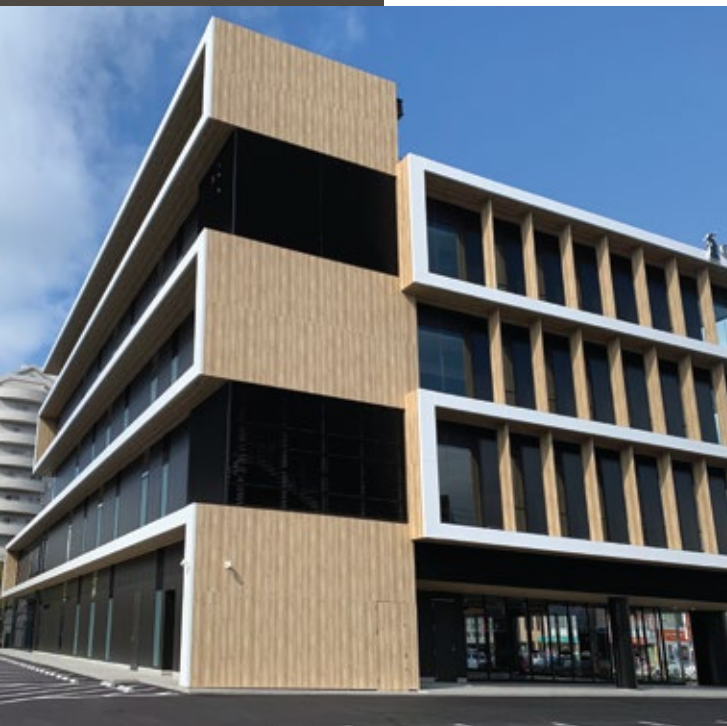

Aluminium Decor Panel is coated with High Class Exterior spec coating.
Coated by Offset Gravure. Direct Printing Technology. Aluminium Alloy : A3004P H32

Warranty

We offer a 10 years warranty for color retention in exterior applications.
Please contact us for further information.

Manufacturing Capabilities

Print Width : 650mm ~ 1,220mm
Print Length : 1,500mm ~ 4,500mm
Thickness : 0.6mm ~ 3.0mm
* More than 2 tons of raw material
will be required for size customization.

Non-Combustibility

BS 476 : Part4 (3mm / Certificated in Singapore)

ASTM E84 (Certificated in USA)

NM-2698 (All Thickness / Certificated in Japan)

Weatherability

AAMA 2605 (Certificated in USA).

Sunshine Weather-O-Meter (SWOM) 10,000 hours
($\Delta=2-3$ /Equivalent to 20 years. Tested in Japan).

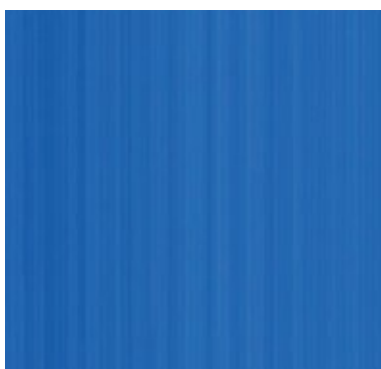

Oldest Exterior project was installed in 1999, Maxdo
Centre - Shanghai, China.

Can be processed and formed into various types
of architectural applications such as: Ceiling and
walls; Grilles and facades; as well as for custom or
creative application in various uses.
